

D-O LRT Project NCCU Station Study

September 22, 2016

Background

- Combined FEIS/ROD for the D-O LRT Project was issued in February 2016
- GoTriangle committed to study several potential refinements as the project advances
- Preliminary evaluation of the addition of an NCCU station is underway

Initial Study Results

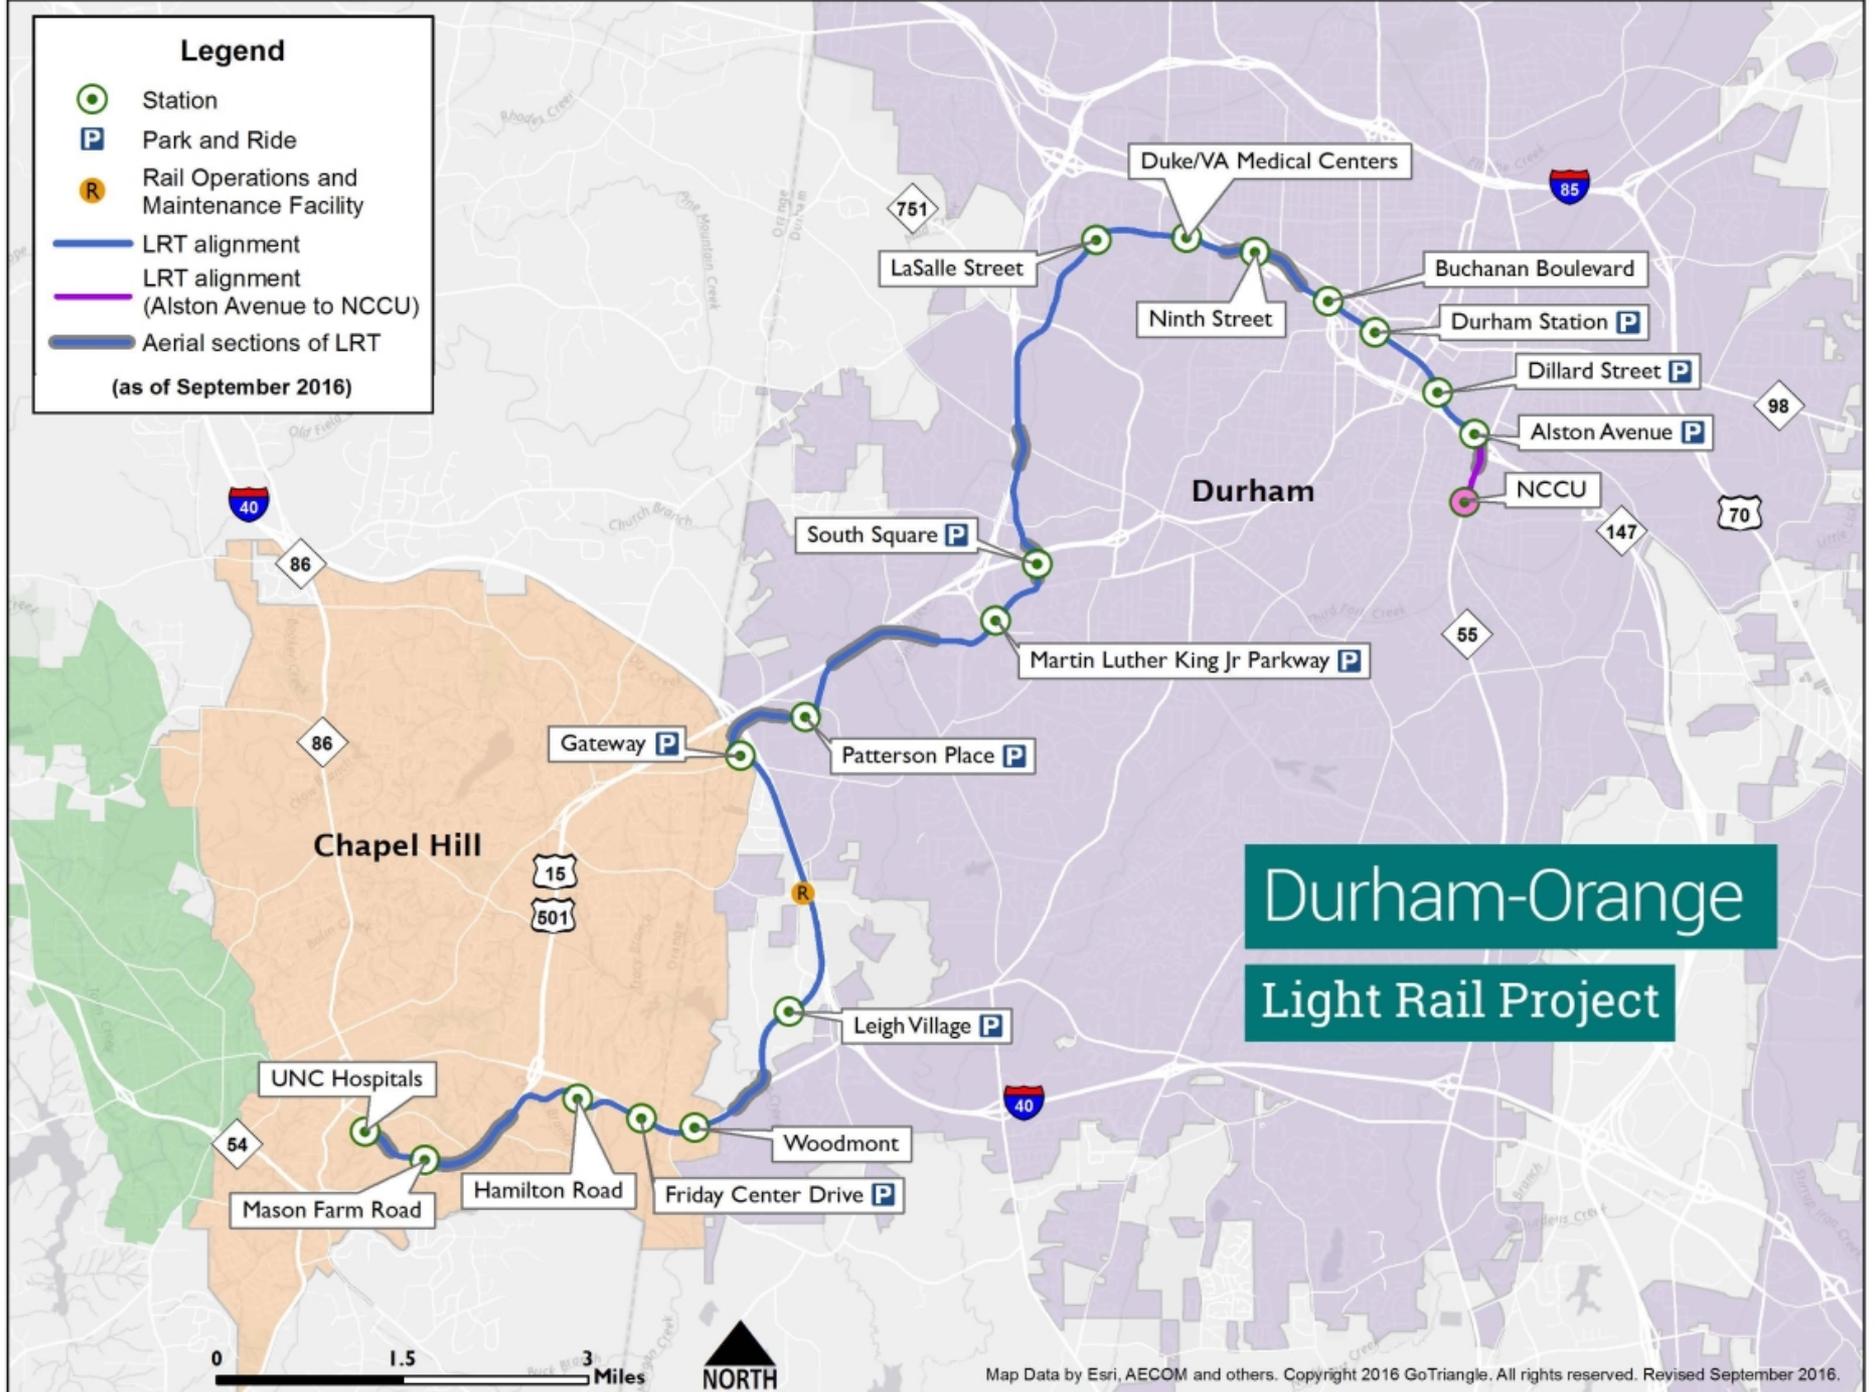

- Addition of the station and additional length of light rail tracks is feasible from an engineering standpoint
- Ridership at the proposed station would be high

Next Steps – by December

- In order to advance the potential addition of an NCCU Station for further study in Engineering –
 - The Locally Preferred Alternative (LPA) for the D-O LRT Project must be amended to include the NCCU Station
 - The 2040 MTP must be amended to include the amended LPA

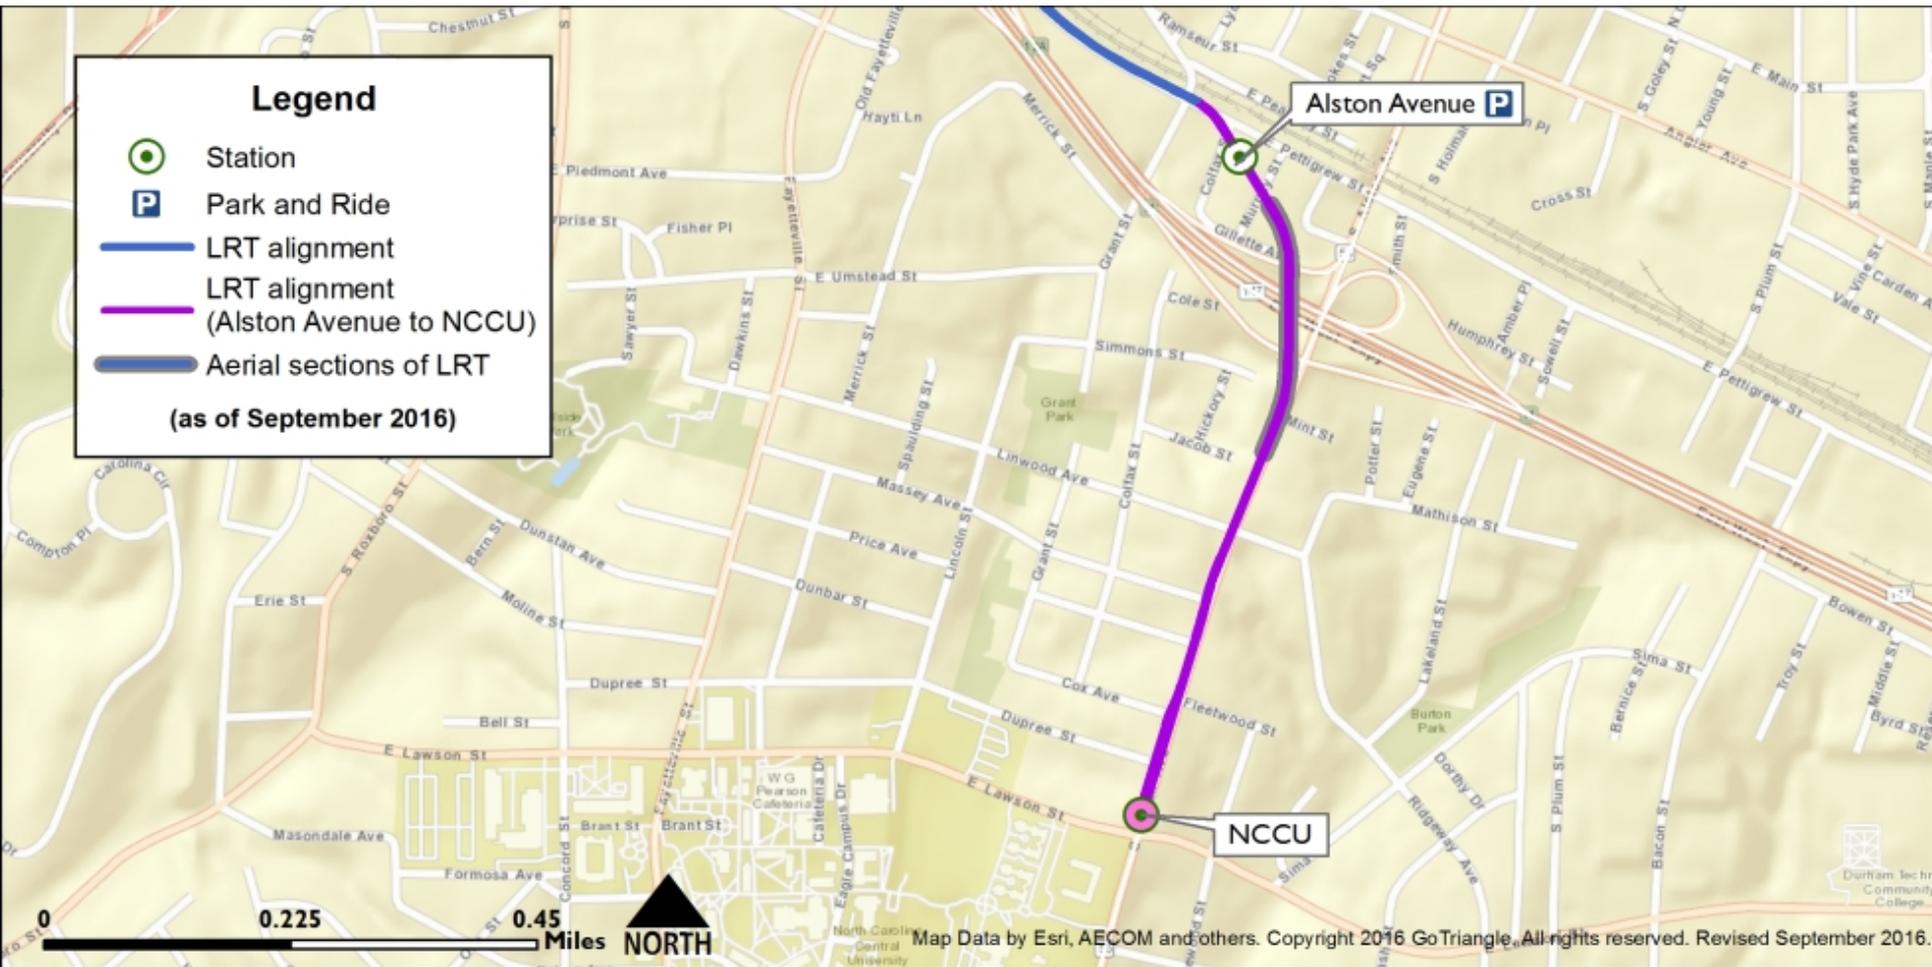

Legend

- Station
 - Park and Ride
 - Rail Operations and Maintenance Facility
 - LRT alignment
 - LRT alignment (Alston Avenue to NCCU)
 - Aerial sections of LRT
- (as of September 2016)
